THE NATURE LOVER WALKING TRAIL

The trail starts at Devil's Gap Path...

From Cathedral Square, head up Library Steps to Devil's Gap Path.

1 Devil's Gap Path

Leave the hustle and bustle of the town behind as you make your way into the Gibraltar Nature Reserve Upper Rock via this small tranquil footpath.

2 Genoese Battery

Circumventing the roads that criss-cross the Nature Reserve, continue the trail along this former military post surrounded by dense vegetation.

3 Apes' Den

Meet some of the Barbary macaques in one of their favourite feeding spots, before proceeding on your path along the steps of Charles V Wall.

4 Inglis Way

The trail continues along this footpath, some 1,200 metres in length that traverses the middle section of the Upper Rock through some of the richest flora and fauna in Gibraltar. The vegetation includes Olive trees, White Asparagus, Common Asphodel, Esparto Grass and numerous other species typical of the Mediterranean 'marquis shrubland' that characterises the area. Fauna includes numerous bird species, Barbary Partridges and several species of lizards.

5 Tovey Battery

Pause for a breath at the former military defensive post, hidden away from the main road in the Upper Rock.

6 Princess Caroline's Battery

Another great spot to catch the famous Barbary macaques of Gibraltar. This battery with views over the town area and the Bay of Gibraltar, is also a great lookout point especially for observing Southbound bird migration.

7 Moorish Castle

Make your way back into town via the old Moorish Castle and defensive wall, ending your trail at Casemates Square.
